Subject: RE: PFAS

"Addressing Per- and polyfluoroalkyl substances (PFAS) is one of EPA's top priorities and the agency is committed to continuing to participate in and contribute to a coordinated approach across the federal government. Federal agencies are developing a variety of tools, including toxicity values, analytical methods, and treatment options, that can work together to provide states, tribes, local governments, health professionals, and communities with information and solutions to address these chemicals. EPA looks forward to continuing to collaborate with ATSDR and all of our federal partners as we work together to protect public health." - Dr. Peter Grevatt, Director, Office of Ground Water and Drinking Water

Subject: PFAS

Hi All,

You might already be aware of this, but I just received a call from my contact at HHS letting us know the Toxicology profile on PFAS will post tomorrow at 8:45am on the Federal Inspection Desk. Then will hit the federal register on Thursday.

Just wanted to make sure everyone knew this info.

Best Regards,

Christian R. Palich
Deputy Associate Administrator
Office of Congressional & Intergovernmental Affairs
U.S Environmental Protection Agency
